Block-lite's Classic 6 is a high-performance block perfect for decorative retaining walls by providing solid soil retention. The lower profile provides a longer, smoother appearance compared to a traditional retaining wall block. They are capable of sharp radius turns and variable setbacks to provide endless design possibilities. The Classic 6 is the perfect block for any retaining wall project.

CLASSIC 6 COMPONENTS

Universal Cap

Size: 4" H x 18" W x 10.5" D
Weight: 49 lbs

Classic 6 Corner

Size: 6" H x 16" W x 4.5" D
Weight: 25 lbs

Classic 6 Half

Size: 6" H x 9" W x 12" D
Weight: 25 lbs

Classic 6 Wall

Size: 6" H x 18" W x 12" D
Weight: 57 lbs

Classic 6 Base

Size: 6" H x 18" W x 12" D
Weight: 57 lbs

It's Fast...

Located on the underside of each Classic® block, the 4" x 2" Anchor Bar creates an automatic setback with the highest shear resistance in the industry. Plus, Classic's fewer pieces, pinless design, and lower weight per square foot reduces construction time, labor costs, and freight charges.

It's Simple...

"One Unit" construction is a vital element of Classic's superior design. 90° corners and half blocks are made simply by removing a portion of the block. No special blocks are required; no special inventories are needed; no shortages occur on the jobsite!

It's Strong...

Upon assembly, Classic blocks automatically create 4" x 5" vertical "stone columns". When layered with grid, the gravel filled "stone columns" provide a multi-point interlock, for a more uniform block-to-grid connection.

It's Versatile...

Variable setbacks, sharp radius turns, "One Unit" construction, and complete interchangeability are all features of Rockwood's Classic System. The ability to mix various sizes and colors within a wall enhances your imagination without sacrificing structural integrity. Plus, the Anchor Bar allows you to build at any setback you desire – from 0° to 14°, providing the only "true" vertical setback in the industry.
