SANTA FE

The three-piece system of Lakeland blocks offers designers the freedom to combine functionality with style, resulting in unique and visually appealing outdoor living spaces. The tumbled block finish creates an aged and weathered look that enhances the natural beauty of any outdoor environment. Block-Lite's Lakeland blocks are versatile and can be used to build random-pattern outdoor living rooms, kitchens, islands, garden and seat walls, pillars, planters, and more.

Medium Block

Size: 4" H x 8" W x 8" D
Weight: 15 lbs

Small Block

Size: 4" H x 4" W x 8" D
Weight: 8 lbs

It's Fast...

Lakeland™ is an easy to use, multipiece, mortarless, and pinless wall system. Simply stack and secure Lakeland blocks with Super-Stik® high quality masonry adhesive to build lasting, functional, and attractive outdoor environments.

It's Simple...

Each unit weighs between 10 and 30 lbs., making Lakeland as easy to handle, as it is to install. Its size makes it perfect for any weekend project such as garden walls, seat walls, pillars, columns, planters, egress windows, and small retaining walls.

It's Strong...

Due to the natural materials used in concrete, these blocks are highly durable and able to withstand extreme weather conditions, including heavy rain and harsh winds. These blocks are designed to last for years to come.

It's Versatile...

Offering greater design flexibility than pin and lip systems, Lakeland is as popular for its buildability as it is for its great looks. The three units can be arranged to create an endless variety of unique applications.
