Block-Lite's Classic 6 is a high-performance block perfect for decorative retaining walls by providing solid soil retention. The lower profile provides a longer, smoother appearance compared to a traditional retaining wall block.

They are capable of sharp radius turns and variable setbacks to provide endless design possibilities. The Classic 6 is the perfect block for any retaining wall project.

COMPONENTS

UNIVERSAL CAP

Size: 4" H x 18" W x 10.5" D
Weight: 49 lbs

CLASSIC 6 HALF

Size: 6" H x 9" W x 12" D
Weight: 25 lbs

CLASSIC 6 WALL

Size: 6" H x 18" W x 12" D
Weight: 57 lbs

CLASSIC 6 BASE

Size: 6" H x 18" W x 12" D
Weight: 57 lbs

Efficiency: Located on the underside of each Classic® block, the 4" x 2" Anchor Bar creates an automatic setback with the highest shear resistance in the industry. Fewer pieces, a pinless design, and lower weight per square foot reduce construction time, labor costs, and freight charges.

Simplicity: Classic's "One Unit" construction allows 90° corners and half blocks to be created by simply removing a portion of the block. No special blocks, no special inventory, and no jobsite shortages.

Durability: Upon assembly, Classic blocks automatically form 4" x 5" vertical stone columns. When layered with grid, the gravel-filled columns create a multi-point interlock for a more uniform block-to-grid connection.

Versatility: Variable setbacks, sharp radius turns, complete interchangeability, and "One Unit" construction define Rockwood's Classic System. Mix sizes and colors freely without sacrificing structural integrity. The Anchor Bar allows setbacks from 0° to 14°, providing the only true vertical setback in the industry.
