Outdoor Fire Ring Kits

Gather around something built to last.

| GRAND FIRE RING

The Grand Fire Ring Kit is the centerpiece your backyard deserves. At 48" diameter with a 31" interior, it's built around a one-piece heavy-gauge solid steel insert that protects the block and delivers years of reliable performance through Northern Arizona's demanding seasons.

Built with Rockwood block and a U.S. Park Service grade steel insert, this fire ring is designed to last indefinitely. Keep it simple or dress it up with a full range of add-ons lets you build exactly what you need.

WOOD BURNING

| GRAND GAS FIRE RING

Designed for slab, paver, or gravel bases, the Grand Gas Fire Ring Kit brings style and convenience together. Smokeless and ashless, it's the ideal solution for Northern Arizona properties with open burning restrictions – all the ambiance, none of the hassle.

Push-button electronic ignition, a thermo-couple auto shut-off, and 65,000 max BTU/hr make this the worry-free option. Available in natural gas or LP, with optional HA conversion kits for high-altitude installations.

ADD-ON OPTIONS

| GRAND FIRE RING

Grand Fire Ring Cap

Chiseled edge, eight-piece in one color, Indiana Limestone at 2.25" H creating a clean finished look.

Grand Fire Ring Layer

Add block layers to increase the height of your fire ring to suit your space.

Grand Fire Ring Swivel Cooking Grate

Removable, heavy steel construction & ADA compliant. Turns your fire ring into an outdoor grill.

Grand Fire Ring Cover

Heavy galvanized steel cover keeps ash and debris out when the fire ring is not in use.

Grand Fire Ring Cover Slotted

Same heavy galvanized steel cover with a slot to accommodate the swivel cooking grate.

| GRAND GAS FIRE RING

Grand Gas Fire Ring Log Set

Optional Grand Canyon ceramic log set that adds a realistic wood-fire aesthetic to your gas ring.

Grand Gas Fire Ring LP Conversion Kit

Converts the unit to liquid propane fuel for installations without a natural gas line.

Grand Gas Fire Ring NG HA Conversion Kit

The high-altitude natural gas conversion is engineered for elevations where standard orifice sizing falls short.

Grand Gas Fire Ring LP HA Conversion Kit

The high-altitude LP conversion gives the same high-altitude performance tuning for liquid propane fuel.

Grand Fire Ring Cap

Compatible with both wood and gas models. Chiseled edge cap in one color, Indiana Limestone at 2.25" H.

PROVEN DURABILITY

Rockwood block and U.S. Park Service grade steel are built to outlast the elements.

AFTERNOON ASSEMBLY

Most kits build in a single afternoon. No contractors, no surprises.

BUILD YOUR WAY

Expand with add-ons whenever you're ready. The system grows with you.

LOCAL EXPERTISE

High-altitude conversion kits available and tuned for Northern Arizona elevations.
