Holland Stone

COLORS

ANTIQU GREY

SONORAN BLEND

SEDONA RED

MOUNTAIN BLEND

Holland Stone by Block-Lite is a timeless, single-block paver system built for durability and design flexibility. The single 4x8 unit locks into four distinct laying patterns, Herringbone, Running Bond, Single Basket Weave, and Basket Weave, so the same paver can take on a different character depending on the project. Manufactured to industry-leading standards, it holds up to heavy foot and vehicle traffic season after season.

Available in Sedona Red, Antiqu Grey, Sonoran Blend, and Mountain Blend, Holland Stone works equally well as a driveway, patio, or pool deck. It installs easily and requires little upkeep over time. Individual units shift with the ground rather than cracking, making it stronger and more resilient than poured concrete or asphalt.

BASKET WEAVE

SINGLE BASKET WEAVE

RUNNING BOND

HERRINGBONE

Versatile: A single block shape and size that rearranges into four distinct patterns, from a classic Running Bond to an intricate Herringbone.

Low maintenance: Holland Stone pavers have a lower life-cycle cost than asphalt or poured concrete, with upkeep limited to sweeping and an occasional rinse. Damaged areas can be repaired individually instead of redoing the whole surface.

Unmatched durability: Tightly packed aggregate makes each unit stronger than a poured concrete slab and more resistant to wear from heavy foot or vehicle traffic.

Resilient to cracking: The segmented design lets individual units shift and heave with seismic activity or seasonal frost, instead of cracking the way a solid slab would.
